

I have been a subscriber to XM radio for 1-1/2 years, and I enjoy the clarity of satellite radio and the fact that I can always have a station that I can find what I need. This includes weather and traffic. I pay for this service, and I do not believe that this should be legislated as to what I can hear on this service. I would appreciate the FCC to reject NAB's petition 04-160 to allow satellite subscribers to receive the programming that we want and enjoy. Thank you for your time.
